APPENDIX E: CABINET MODELS

Part of what makes POD sound so much like a real guitar amplifier and cabinet setup are the cabinet models that it uses. Whenever you select an Amp Model, POD automatically matches it up with an appropriate cabinet for you to play through. If you use the Emagic SoundDiver software to for deep editing of your POD's parameteres, you can mix and match amp and cabinet models to create your own custom setups. There are sixteen cabinet flavors to choose from.

#	Model	Based On
1	1x 8	'60 Fender Tweed Champ
2	1x12	'52 Fender Tweed Deluxe
3	1x12	'60 Vox AC15
